INTRODUCTION

Willside Technologies & Multi-Services Limited provides one stop automated solutions for your trade and industry. Depending on the size and field of your organization, we have different services to meet your requirements. We provide optimum and customized solutions made for your organization.

Willside Technologies & Multi-Services Ltd is focusing exclusively in high quality and cost-effective software development and implementation of services. We are advancing on a tremendous pace and with involvement of skilled and experienced people working in the organization. Willside has done a number of projects for government MDAs, the Military and private companies.

YOUR AUTOMATION PARTNER

The company has been formed by a group of professionals with a lot of experience and wide exposure in Information Technology. People involved here are young qualified business graduates and qualified engineers from the renowned universities across the globe.

The resource personnel working in the company have been consistently providing reliable support services and consultancy to a wide variety of corporate bodies either in the capacity of executive or as business partner or consultant. Bottom line of the company philosophy is to give you quality and modern applications and building a long-term business partnership with our clients.

Willside is a company where professionals from both technical and functional sectors group together with an objective of providing appropriate business solutions. We realize the importance of functional knowledge and its impact in developing business solutions. We constantly strive to be a leading technology firm with profound business and functional knowledge. The key to the company's success is the maintenance of a close working relationship with the clients through ensuring the best possible solutions to their needs; to establish and maintain a thorough knowledge and understanding of client's objective and help them maximize the benefits.

We want to establish ourselves as the best choice in Information Technology Services, Consultancy and Development by offering the full spectrum of services.

OUR SERVICES

SOFTWARE DEVELOPMENT

With design and development expertise in diverse platforms, best-of-breed tools and techniques, combined with industry best practices, Willside Technologies offers scalable end-to-end application development and management solutions from requirement analysis for deployment and rollout. We are developing software, related to management, commercial jobs, accounting software for trading, and conglomerates. We hope to come to you with desired software at a reasonable cost. Willside's services span the following application lifecycle stages

APPLICATION DEVELOPMENT

Providing end-to-end development from requirement analysis for deployment and rollout

APPLICATION MAINTENANCE

Changing or enhancing software to meet changing or increasing business demands in the post-rollout phase of an application

APPLICATION SUPPORT

Providing first, second, third line support and on-call support

APPLICATION INTEGRATION /MIGRATION/TRANSFORMATION

Replacing, migrating and integrating legacy or bespoke

Growth in the Solution Integration (SI) services market is fueled by the need for seamless business processes across an organization's complete value chain of customers, partners, suppliers, and employees. Willside's services enable clients to identify, develop, and implement the best-fit solutions which are equipped to meet their changing business requirements.

Willside Technologies' Solution Integration services offer to:

- Leverage IT investments
- Minimize risks

Willside provides total project management, right from design, integration, system and interface development to migration backed by world-class methodologies, well-defined solution frameworks and extensive integration experience with tier-1 service providers.

OTHER SERVICES

Willside Technologies Managed Services offerings cover the entire array of IT outsourcing services including networks, IT infrastructure, applications and business processes. This provides our customers the best of both worlds - control and flexibility over their information systems without either the pain or cost of running them.
